Risk management is an important factor in conducting business in the capital market industry, especially for securities companies that provide financing facilities for their clients and must bear credit risk. Risk mitigation carried out with initial analysis on the characters of the facility recipient candidates similar to implementation of the 5C principle in banking sector will complement the existing fund and stock availability, margin call and top-up collateral rules.

Added with scores from scoring model of PEFINDO Credit Bureau that can be tailored to the needs, Trimegah Sekuritas will be able to mitigate this risk better.

With the membership in PEFINDO Credit Bureau, the risk management at Trimegah Sekuritas will be even better, and at the same time improve the quality of corporate governance, which in turn makes Trimegah Sekuritas a public company that always raises value for its shareholders.

Now, analysis process of financing facilities request such as margin trading can be further assisted with the help of private credit bureaus such as PEFINDO Credit Bureau through credit information report that can describe the character of the facility applicant through scoring information, risk level and possibility of default.

Furthermore Yohanes added that PEFINDO Credit Bureau is committed to support enhancement of risk management and encourage securities companies to mitigate risks by deeply analysing the character of the facility applicants through PEFINDO Credit Bureau services so that the risk of default can be reduced. “Data from the banking industry and multifinance will complement the existing database coverage within securities companies industry, so that the applicant’s background will be more complete and accurate”, Yohanes added.

“Trimegah Sekuritas membership in PEFINDO Credit Bureau is expected to be followed by other securities companies, thus forming risk profile of debtors in the capital market that will complement the database of debtors of banks and financing companies, which ultimately can help the financial industry in credit risk mitigation”, Yohanes concluded.
