

Trimegah Investment App (Trima) Available in Desktop Version

- Trima desktop version provides eight benefits, simplifies investing
- Trimegah underlines strong commitment in supporting financial inclusion, particularly in capital market
- Trima desktop version appears in user-friendly interface for new investors, yet able to accommodate needs of advanced investors

Jakarta, May 15, 2017 – Following the successful launch of investment application Trima: Trimegah Investment App for smartphones, tablets and smart watches in February 2017, PT Trimegah Sekuritas Indonesia Tbk (“Trimegah”) today launches the Trima desktop version.

The Trima desktop version is introduced to further complement facilities available for investors. The introduction of Trima is part of Trimegah’s strategy in supporting financial inclusion, particularly in the capital market.

Trimegah President Commissioner/Independent Commissioner Rizal Bambang Prasetijo said that in this digital era, innovation in the information technology sector is a necessity. “The challenge for the securities industry in Indonesia is rather unique. We see a huge investor potential that has yet to be untapped due to the stereotype that investing in the capital market is a complicated process. Trimegah attempts to change this paradigm by gradually developing user-friendly applications that can attract the interest of beginner investors.”

The introduction of the Trima desktop version complements Trimegah’s innovation series in utilizing technology to develop its business. Trimegah has a mission to contribute to improving public welfare through investments. “In addition, with the presence of Trima, Trimegah also hopes to significantly expand the number of active investors in the retail segment to ensure real contributions to the Indonesian capital market industry,” said Rizal.

In addition to beginner investors, Trima also accommodates the needs of experienced ‘professional investors’ with its various excellent menus.

Trimegah Chief Operation Officer Paul Rafiuly said, “Trima is an all-in-one investment app that comes with features that allow investors to experience fast, easy and convenient investments without ignoring security elements. Through Trima, investors do not need to move accounts around to manage their investments, whether mutual funds or stocks. Through this application, we strive to provide the best experience for customers (best customer experience) in investing.”

The Trima desktop version has eight (8) advantages. Some of which are even the first features in applications provided by securities companies in Indonesia. “We also apply the advantages of the Trima mobile version in the Trima desktop version. We then add other advantages, such as trade summaries and systems that integrate the various devices used, to make it easier for investors,” said Paul.

Trima's eight advantages:

1. Easy to use interface (user-friendly design & customizable landing page)
2. Trusted trading recommendation (institutional-level quality trading ideas)
3. Inter-device connectivity
4. Integrated alert system
5. Single portfolio view for multiple products
6. Fully integrated system
7. Trade summary
8. E-appointment

The Trima desktop version can be downloaded through the Trimegah website at www.trima.trimegah.com, both for MAC and Windows PC. In addition, the Trima apps is also available for Android and iOS-based smartphones, tablets and smart watches.

--- End ---

Fact Sheet

Eight Advantages of Trima Desktop Version

- 1. Easy to use interface (user-friendly design & customizable landing page)**
The Trima desktop version is very easy to use, both for beginner and experienced investors. Additionally, at the home page, investors can easily add an information widget to suit their needs.
- 2. Trusted transaction recommendation (institutional-level quality trading ideas)**
To help investors in their investing decision, Trima is equipped with research and recommendations with institutional-level quality.
- 3. Inter-device connectivity**
To accommodate the needs of increasingly mobile investors, Trima allows investors to manage their portfolios from various integrated devices, whether through smartphones, tablets, smartwatches or desktops. For example, the stock information selected to be monitored on one device will automatically appear on other devices.
- 4. Integrated alert system**
Through the Trima desktop version, users can set the notification system for the monitored securities. This setting will then be directly integrated with Trima on smartphones, tablets, or smartwatches.
- 5. Single portfolio view for multiple products**
Stock transactions, mutual funds and bonds can be done in one account in one Trima program. There is no need to change accounts anymore.
- 6. Fully integrated system**
Trima is the first application that integrates investor's portfolio of mutual funds and bonds that can be used as collateral when investors conduct stock transactions.
- 7. Trade summary**
Trima is equipped with an analysis of clients transaction patterns through the trade summary feature. In this feature, investors can evaluate their investments and take it as inputs for next investment decisions.
- 8. E-appointment**
The E-appointment feature allows investors to make an appointment with a Trimegah Account Officer according to the time they desire.

About Trimegah

Established in May 1990, PT Trimegah Sekuritas Indonesia Tbk (previously PT Trimegah Securities Tbk) earned its Broker Dealer License and Underwriting License from the Capital Market Supervisory Agency (*Bapepam*) in 1992 and 1993.
