

Trimegah and DANA Partner to Expand Access to e-Retail Government Bonds (SBN)

Jakarta, June 12, 2025 - DANA, a digital wallet-based financial technology company, has established a strategic collaboration with PT Trimegah Sekuritas Indonesia Tbk ("Trimegah Sekuritas") to present Government Securities (SBN) products in the primary market that can be purchased directly through the DANA application. This innovation is a strategic step to expand access to safe, easy, and inclusive investment for all levels of society, especially the younger generation such as Gen Z and Millennials.

Public interest in investment continues to show an increasing trend, along with the acceleration of digital transformation in various sectors. Until April 2025, data from the Indonesian Central Securities Depository (KSEI) as of April 2025 shows that the number of SBN investors has reached 1,244,757 people; there is still room for increase compared to the number of capital market investors, which reached 16,245,270. This figure reflects the great potential for retail SBN market penetration in the future. Moreover, SBN is an investment instrument the state guarantees and offers competitive returns.

Vince Iswara, CEO & Co-Founder of DANA Indonesia also realizes that access and literacy are two sides of the same coin that cannot be separated. Therefore, the launch of this feature also opens the door to the financial welfare of the community.

"Our collaboration with Trimegah Securities allows the public to buy e-SBN directly through the DANA application. A step that shows that state investment is not only for those who are financially expert, but the right of all citizens. With the support of Trimegah Securities as a trusted partner in the capital market, we want to bridge this potential. We ensure that anyone, young people, informal workers, or people in remote areas, can participate in financing national development safely, easily, and simply. E-SBN is not just an investment instrument. This is a form of citizen participation in building the country," said **Vince**.

With this launch, DANA premium users can invest in Retail SBN products. These products include Indonesian Retail Bonds (ORI), Retail Sukuk (SR), Retail Saving Bonds (SBR), and Savings Sukuk (ST). All of these products are available in the DANA application on the e-SBN menu according to the schedule issued by the government. The entire process, from registration to purchase, can be done on one platform, without having to switch channels.

This product is designed to provide a more straightforward and user-friendly investment journey, especially for novice investors and people who have never used financial services. Through an intuitive interface and integrated process, users can go through all stages of investment more concisely and practically.

The advantages of the e-SBN product are not only easy access, but also its broad distribution reach. Based on sales data for the SBN ST014 series, more than 60 percent of investors still come from western Indonesia, especially outside DKI Jakarta.

With the DANA network that reaches various regions throughout the archipelago, this product opens up opportunities for more even distribution of SBN to all levels of society, while encouraging investment participation from people in various regions. As the only digital wallet in Indonesia that provides Retail SBN products, DANA strengthens its role in expanding financial inclusion through technological innovation. This confirms the vision of both parties to make DANA the largest sub-partner distributor of Trimegah Sekuritas Indonesia in the next few years.

Anung Rony Hascaryo, Director of Trimegah Sekuritas Indonesia said, "This e-SBN product is not only about expanding distribution channels, but also about creating an investment experience relevant to today's society's needs. We believe that strong investment literacy must start with simple and trusted access. Through this collaboration, we want to ensure that e-SBN products are not only easily accessible, but also have a real impact in expanding financial inclusion and encouraging community participation in financing national development."

This collaboration combines the power of DANA's technology and open ecosystem with Trimegah Sekuritas Indonesia's experience in the retail bond market. More than just opening access, this initiative is designed to form a sustainable investment culture and improve people's financial well-being in the future.

DANA premium users can access e-SBN products since February 2025 through the e-SBN icon in the Top 7 primary services or the "Finance" category in the DANA application. With a capital of IDR 1 million, users can buy SBN investments and enjoy profits of up to more than six percent*. For more information about e-SBN DANA, [visit this page](#).
